DETAILED ACTION

Receipt is acknowledged of Applicant's amendments and remarks filed on 03/24/2009.

- Claims 34, 36, 43, 46, 49 and 50 have been amended.
- Claims 1-18, 24-33, 35 and 40-41 have been cancelled.
- Claims 19-23, 34, 36-39 and 42-51 are pending in the instant application.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

> The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 36 and 49 rejected under 35 U.S.C. 112, second paragraph **are withdrawn** in view of amendment to the claims.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

> (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham* **v.** *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.

3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. Claims 19-23, 34, 36-39 and 42-51 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marcenyac et al (US 2004/0146547) and Granger et al (US 5,149,538) in view of Church (6,660,901) **are maintained** for reasons of record in the previous office action filed on 02/17/2009 and as discussed below.

Applicant asserts that Granger et al neither teach nor suggest the use of a removable barrier that is automatically removed upon removal of the patch from the skin of a user.

This argument is unpersuasive, since claims are drawn to a product (transdermal patch or device) and not to a process claims. Product as claimed as a whole is taught by the combination of the cited prior art reference. Further, removable of barrier layer during the use or after the use of device is directed to the intended use of the device. Granger in one embodiment teaches that, if the dosage form is ingested or immersed in a solvent, such as water, alcohol or organic solvent, said barrier layer will be dissolved, solubilized or swelled to release said antagonist substance to substantially attenuate the euphorigenic effect of said opioid for misuse and abuse of the opioid (col. 7 lines 5-11). Applicant is reminded of Pitney Bowes, Inc. v. Hewlett-Packard Co., which affirmed that if the body of a claim fully and intrinsically sets forth all of the limitations of the claimed invention, and the preamble merely states, for example, the purpose of intended use of the invention, then the preamble is not considered a limitation and is of no significance

to claim construction. Pitney Bowes, Inc. v. Hewlett-Packard Co., 182 F.3d 1298, 1305, 51 USPQ2d 1161, 1165 (Fed. Cir.1999).

Applicant also asserts that Church reference does not teach or suggest that activated would be useful in the manner and in the particular application of the present invention.

In response to applicant's argument that Church patent has nothing to do with utilizing activated carbon as an anti-abuse substance for treating residual opioid substances or the like, the fact that applicant has recognized another advantage which would flow naturally from following the suggestion of the prior art cannot be the basis for patentability when the differences would otherwise be obvious. See *Ex parte Obiaya*, 227 USPQ 58, 60 (Bd. Pat. App. & Inter. 1985). Further, Church teaches that the activated charcoal in skin patch combined with one or more host materials to produce a solid gel-like substance which can be used for the purpose of adsorbing toxins, bacteria, fungus, carcinogens and other harmful pathogens.

Conclusion

1. No claims are allowed at this time.

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
